WHO WE ARE

About Lawhenz Energy

Lawhenz Energy Ltd is a renewable energy and power solutions company providing reliable, scalable and sustainable energy solutions for homes, businesses, institutions and commercial facilities. We design, supply, install and maintain solar energy systems that help our clients achieve reliable electricity, lower energy costs and greater energy independence.

Every solution we deliver is built around the client's actual energy needs, load profile, budget and future expansion plans — ensuring systems that are not only functional today, but ready to scale as demand grows.

6+

CORE SERVICE LINES

100%

CLIENT-SPECIFIC DESIGN

End-to-End

EPC DELIVERY

OUR MISSION

To deliver dependable, high-quality solar and hybrid energy systems that give homes, businesses and institutions genuine energy independence — engineered around real consumption data, not guesswork.

OUR APPROACH

From energy audit through design, procurement, installation and after-sales support, our team manages every stage in-house — giving clients one accountable partner from first assessment to long-term maintenance.

WHO WE SERVE

Homes • Businesses • Institutions • Commercial Facilities

● Residential Clients

● Commercial Facilities

● Industrial Plants

● Schools & Institutions

● Estates & Real Estate Developers

WHAT WE DO

Our Services

01

Residential Solar Solutions

Solar and battery systems designed for homes, estates and high-energy residential properties, sized to match everyday household consumption.

02

Commercial & Industrial Solar

Large-scale solar solutions for businesses, factories, offices, institutions and commercial facilities with demanding, continuous power needs.

03

Solar EPC

Complete Engineering, Procurement and Construction services — from energy assessment and system design through procurement, installation, testing and commissioning.

04

Battery Energy Storage

Advanced battery storage solutions for backup power, energy management and improved energy independence, day or night.

05

Hybrid Energy Systems

Integration of Solar + Battery + Grid + Generator to provide a more reliable, efficient and cost-effective power solution.

06

Energy Audit & Consultation

Professional assessment of a client's electricity consumption, power sources and energy costs to determine the right-fit energy solution.

07

Operations & Maintenance

System monitoring, preventive maintenance, troubleshooting and after-sales technical support to keep every solar installation performing at peak efficiency long after commissioning.

HOW WE WORK

Every engagement begins with an energy audit of the client's actual consumption and load profile. From there, our team designs, procures, installs and commissions the system — then stays on for ongoing monitoring and maintenance, so clients have a single accountable partner from first assessment to long-term performance.

OUR WORK

Our Projects — Commercial & Industrial

Large-format rooftop array — a multi-row commercial solar installation delivering high-capacity daytime generation for facility operations.

Institutional Project — aerial view of a multi-building rooftop deployment.

Field Team — our technicians on-site through installation and commissioning.

● Commercial Solar

● Industrial Energy Solutions

● Institutional Solar Projects

OUR WORK

Solar + Battery & Hybrid Systems

Residential Storage — wall-mounted inverter with dual battery bank.

Deye Hybrid Install — inverter, battery and distribution board.

Battery Room — rack-mounted storage for a larger facility.

INDUSTRIAL POWER CABINET INSTALLATION

Outdoor hybrid power enclosures — weatherproof cabinets housing inverter and control systems for a large-scale commercial deployment.

LEADERSHIP

Meet the Managing Director

Udenna Lawrence C.

MANAGING DIRECTOR, LAWHENZ ENERGY LTD

Udenna leads Lawhenz Energy's mission to make reliable, sustainable power accessible to homes, businesses and institutions. Under his direction, the company has built a reputation for engineering solutions around each client's actual energy needs — rather than one-size-fits-all installations.

His approach centers on accountability: managing every project end-to-end, from initial energy audit through design, procurement, installation and long-term maintenance, so clients deal with one dependable partner throughout.

1

Needs-based design — every system is sized to the client's real load profile, budget and future expansion plans, not a generic package.

2

Full EPC capability — energy assessment, design, procurement, installation, testing and commissioning delivered under one roof.

3

Long-term support — ongoing monitoring, preventive maintenance and technical support keep systems performing well after handover.

OUR PROMISE

Every Lawhenz Energy installation is backed by the same team from first energy audit to final commissioning — and stays backed by us afterward, through ongoing monitoring, maintenance and technical support.

Let's Power Your **Next Project**

Whether it's a home, a factory floor or an entire institution — we design energy systems around what you actually need. Get in touch to schedule a free energy assessment.
